IN THE UNITED STATES DISTRICT COURT  
FOR THE NORTHERN DISTRICT OF CALIFORNIA

QUAD/TECH INC.,

Plaintiffs,

v.

Q.I. PRESS CONTROLS, et al.,

Defendants.

No. C 10-2243 CRB

**ORDER GRANTING MOTION TO  
DISMISS**

Now pending before the Court is Defendant's<sup>1</sup> Motion to Dismiss under Rule 12(b)(6) or in the alternative, to Transfer Venue.

This patent infringement suit involves printing technology for newspapers, magazines, and similar mass-market items. In this action, Plaintiff claims that Defendants' Intelligent Density System ("IDS") infringes Plaintiff's patents nos. 7,032,508 ("508 patent") and 5,412,577 ("577 patent"). In other words, Plaintiff brings two causes of action in this suit: (1) alleged infringement of the 508 patent by the IDS device ("508/IDS cause of action") and (2) alleged infringement of the 577 patent by the IDS device ("577/IDS cause of action").

Pending in the Eastern District of Pennsylvania is another patent infringement suit involving similar claims between similar parties. In particular, the same Plaintiff claims that

---

<sup>1</sup> There are two named Defendants in this case, but only one Defendant, Q.I. Press Controls North America, brings this Motion. The other Defendant, Q.I. Press Controls B.V. of the Netherlands, has not yet been served.

1 the same Defendants<sup>2</sup> infringe the 577 patent with their markless Register Control device  
2 (“mRC”) (“577/mRC cause of action”).

3 Defendant moves to dismiss this case under Rule 12(b)(6) on grounds of the first-to-  
4 file rule or claim-splitting. In the alternative, Defendant moves to transfer this case under 28  
5 U.S.C. § 1404(a) to Pennsylvania. For the following reasons, the Court TRANSFERS the  
6 508/IDS cause of action to Pennsylvania under the first-to-file rule, DISMISSES the 577/IDS  
7 cause of action without prejudice under the first-to-file rule, and does not reach the  
8 alternative Motion to Transfer Venue.

9 **I. BACKGROUND**

10 On June 5, 2009, Plaintiff Quad/Tech filed suit in the Eastern District of Pennsylvania  
11 claiming, among other things, that Defendants Q.I. Press Controls B.V. and Q.I. Press  
12 Controls North America infringed Plaintiff’s 577 patent with their mRC device. See  
13 Defendant’s Request for Judicial Notice (“RJN”) (Dkt. 16) Ex. A, C.

14 Less than a month later, on July 2, 2009, Plaintiff filed a motion for preliminary  
15 injunction in that case. Id. Ex. A. The parties filed opposition, reply, and surreply briefs,  
16 and pre-hearing briefs on specific issues. Id. The court then held a hearing, and the parties  
17 filed post-hearing briefs on claim construction and proposed findings of fact and law. Id.  
18 After all of this work had been done, Plaintiff, on March 22, 2010, sought leave from the  
19 court to file a second amended complaint, to add a claim that the IDS also infringed the 577  
20 patent. Motion for Leave to File a Second Amended Complaint (Dkt. 92), Case No. 09-2561  
21 (E.D. Pa. 2010).

22 On April 6, 2010, the court issued an opinion denying the preliminary injunction. See  
23 Quad/Tech, Inc. v. Q.I. Press Controls B.V., 701 F. Supp. 2d 644 (E.D. Pa. 2010). That same  
24 day, the court also issued an order denying Plaintiff’s request to file a second amended  
25 complaint. Tecce Decl. Ex. A. The order simply stated: “Plaintiff’s motion for leave to file a  
26 second amendment complaint... is DENIED.” Id.

27  
28  

---

<sup>2</sup> The Pennsylvania case also involves a third Defendant, Print2Finish LLC, not a party here.

1 On May 3, 2010, Plaintiff filed a notice of appeal, and on May 6 the court placed the  
2 case in suspense pending disposition of the appeal. *Id.* Exs. A, F.

3 On May 24, 2010, Plaintiff filed the instant action against Defendants, claiming that  
4 their use of the IDS infringed the 577 patent and another patent, the 508 patent.

5 In summary, the 577/mRC cause of action is pending in Pennsylvania, and a 577/IDS  
6 cause of action was attempted, unsuccessfully, to be added in that case. Pending before this  
7 Court is the 508/IDS and 577/IDS causes of action.

## 8 **II. DISCUSSION**

9 The Court will first address the “first to file” rule. “The ‘first to file’ rule allows a  
10 district court to transfer, stay, or dismiss an action when a similar complaint has already been  
11 filed in another court.” *Alltrade, Inc. v. Uniweld Products, Inc.*, 946 F.2d 622, 623 (9th Cir.  
12 1991). It is based on principles of judicial efficiency, judicial comity, and sound judicial  
13 administration. *Id.* at 625; *Pacesetter Sys., Inc. v. Medtronic, Inc.*, 678 F.2d 93, 93-95 (9th  
14 Cir. 1982). “[A]n ample degree of discretion, appropriate for disciplined and experienced  
15 judges, must be left to the lower courts,” as to its use. *Pacesetter*, 678 F.2d 93, 95 (citing  
16 *Kerotest Manufacturing Co. v. C-O-Two Fire Equipment Co.*, 342 U.S. 180, 183-84 (1952)).  
17 The first-to-file rule applies where the two matters exhibit chronology, identity of parties,  
18 and similarity of issues. *Alltrade*, 946 F.2d at 625-27. To satisfy the third element, the  
19 issues need not be identical, but they must be substantially similar, and there must be  
20 substantial overlap between the two suits. *Intersearch Worldwide, Ltd. v. Intersearch Group,*  
21 *Inc.*, 544 F. Supp. 2d 949, 959 (N.D. Cal. 2008) (citations omitted).

### 22 **A. The 508/IDS Cause of Action**

23 The parties do not dispute the first element under the first-to-file rule: chronology.  
24 Nor do the parties dispute the second element under the first-to-file rule: similarity of parties.  
25 In fact, the only difference between the parties in the two cases is the existence of  
26 Print2Finish LLC as a third Defendant in Pennsylvania, and the absence of that Defendant in  
27 this case in California. Defendant asserts that the involvement of Print2Finish in  
28 Pennsylvania is immaterial, Mot. at 9 n. 3, and Plaintiff does not dispute that assertion.

1 The parties do dispute whether the third element - substantially similarity between the  
2 two causes of action - is satisfied. The Court finds that it is.

3 Both causes of action share similar technology, similar claim terms, and similar  
4 issues. Both patents are directed to printing technology that ensures the accuracy of desired  
5 colors in mass-market print items, such as newspapers and magazines. See the 577 patent;  
6 508 patent. The similarity of the technologies behind both patents is also indicated by the  
7 fact that both patents share a common inventor. The fact of a common inventor in both cases  
8 also implicate depositions of the same inventor, and thus applying the first-to-file rule here  
9 would promote efficiency. See Pacesetter, 678 F.2d 93, 95 (finding that the first-to-file rule  
10 serves the purposes of promoting efficiency and should not be disregarded lightly) (citing  
11 Church of Scientology v. United States Dep't of the Army, 611 F.2d 738, 750 (9th Cir.  
12 1979). Furthermore, both patents share the common claim terms "color," "ink," and "web."  
13 See the 577 patent; 508 patent. These are sources of common issues of infringement and  
14 validity and create a risk of inconsistent rulings. To risk inconsistent claim construction  
15 rulings of the same claim terms would not be sound judicial administration. See Pacesetter,  
16 678 F.2d 93, 95 (holding that the first-to-file rule is to be applied with a view to the dictates  
17 of sound judicial administration).

18 There are also overlapping issues of law and fact with regard to damages. Defendant  
19 asserts, and Plaintiff does not deny, that the 508/IDS and 577/mRC causes of action arose  
20 from a common set of facts, to wit, the sale of the IDS and the mRC together as a package to  
21 the same customer. Mot. at 6, Reply at 4-5. As a result, both cases would involve inquiries  
22 into the details of that same transaction to determine similar issues, such as lost profits.  
23 Thus, permitting the 508/IDS cause of action to proceed here would not promote judicial  
24 efficiency. See Pacesetter, 678 F.2d 93, 95

25 Finding that the two causes of action are substantially similar, the Court therefore  
26 TRANSFERS the 508/IDS cause of action to Pennsylvania.

27 //

28 //

1           **B.     The 577/IDS Cause of Action**

2           In addition to the similarities discussed above, the similarities between the 577/IDS  
3 and 577/mRC causes of action are even more striking.

4           Not only do the two patents involve similar technology, but they involve the same  
5 technology. Plaintiff argues that the two causes of action are different because they involve  
6 different claims of the 577 patent asserted against different products. Opp. at 9. Defendant  
7 argues that both cases concern Plaintiff's products infringing the same 577 patent. Reply at  
8 7. Defendant argues that both cases involve construction of similar claim terms, Reply at 8-  
9 9, similar remedies, Mot. at 5, and similar issues of invalidity, non-infringement, prosecution  
10 history estoppel, patent misuse, lack of notice/marketing, and equitable defenses, Id. at 7.  
11 Finally, Defendant stresses that when Plaintiff moved to add a 577/IDS cause of action to the  
12 Pennsylvania case, Plaintiff represented that its proposed amendment adding the IDS just  
13 "expand[ed]" its existing claims for patent infringement. Reply at 4; Motion for Leave to  
14 File a Second Amended Complaint at 8-9 (Dkt. 92), Case No. 09-2561 (E.D. Pa. 2010).

15           Defendant has the better argument. First, some defenses, such as patent misuse,  
16 render the entire patent unenforceable, and do not depend on the specific claims at issue nor  
17 the accused product. Thus, as to these types of defenses, there is a clear risk of conflicting  
18 rulings. See Pacesetter, 678 F.2d at 96 (affirming the district court's dismissal and  
19 recognizing the clear risk of inconsistent determinations where one of the central issues in  
20 both cases was unenforceability of the same patents).

21           In addition, there are multiple overlapping claim terms amongst the different claims of  
22 the 577 patent. Plaintiff argues that in this case, only claims covering camera positioning  
23 will be asserted against the IDS, and in Pennsylvania, only claims covering register control  
24 will be asserted against the mRC. Tecce Decl. ¶ 6. Even so, both types of claims still share  
25 overlapping claim terms. For example, claim 29, which covers registry control, shares  
26 multiple claim terms with claim 26, which covers camera positioning. See claims 26 and 29  
27 in the 577 patent (e.g., "memory," "reference array of digital data," "imaging device,"  
28

1 “converter circuit operatively associated with the imaging device,” “color array,” and  
2 “signal”).

3 Plaintiff attempts to downplay the overlap between the two cases by stressing that the  
4 one claim term that the Pennsylvania court construed, “image,” is not at issue in this case.  
5 Opp. at 9. However, the Pennsylvania court construed that term pursuant to a preliminary  
6 injunction motion, and there has not yet been a Markman hearing in Pennsylvania.<sup>3</sup> See  
7 Quad/Tech, 701 F. Supp. 2d 644; RJN (Dkt. 16) Ex. A. Moreover, that the Pennsylvania  
8 court construed only one claim term does not mean that only one claim term, is, and will be,  
9 at issue in Pennsylvania. To the contrary, many of the claim terms that are at issue in the  
10 Pennsylvania case also appear in the claims of the 577 patent. In their preliminary injunction  
11 briefs in Pennsylvania, the parties dedicated much of their analysis to construction of, *inter*  
12 *alia*, the terms “memory,” “reference array,” “converter circuit,” and “processing circuit.”  
13 See Quad/Tech, 701 F. Supp. 2d 644 (E.D. Pa. 2010) (No.09-2561), Opposition to Motion  
14 for Preliminary Injunction (Dkt. 21), Reply to Motion for Preliminary Injunction (Dkt. 51),  
15 and Joint Surreply of All Defendants re Motion for Preliminary Injunction (Dkt. 54). Those  
16 same claim terms appear throughout the 577 patent. Therefore, the 577/IDS and the  
17 577/mRC causes of action overlap with regard to claim terms.

18 For these reasons, the Court applies the first-to-file rule and finds that the 577/mRC  
19 cause of action is the first-filed case, notwithstanding the fact that the two cases do not  
20 involve the same accused-product. See Creston Elec., Inc. v. Lutron Elec. Co., Inc., No. 10-  
21 860, 2010 WL 3035223 at \*3-4 (D. N.J. Aug. 3, 2010) (finding that, although the accused-  
22 products in two cases were not identical, the two cases shared common issues of  
23 infringement and validity of the same patent).

24 Once a court decides that the first-to-file doctrine applies, the court, in its discretion,  
25 can decide to dismiss, transfer, or stay the cause of action. See Alltrade, 946 F.2d at 623,  
26 625. The Court would ordinarily transfer the 577/IDS cause of action to Pennsylvania in the  
27

---

28 <sup>3</sup> In addition, the Pennsylvania court’s construction of the claim term “image” is on appeal  
before the Federal Circuit. See RJN (Dkt. 31) Ex. A.

1 interests of judicial efficiency because there has already been in Pennsylvania motion  
 2 practice, discovery, depositions, evidentiary hearings, claim construction, and a preliminary  
 3 injunction motion and disposition. See RJN (Dkt. 16) Ex. A; Abbott Diabetes Care, Inc. v.  
 4 Dexcom, Inc., No. 06-514, 2007 WL 2892707, at \*2 (N.D. Ill. Sep. 7, 2007) (“By holding a  
 5 preliminary injunction hearing, the Massachusetts district court has already familiarized itself  
 6 with this technology. There is no reason we should duplicate those efforts.”). However, to  
 7 transfer the very cause of action that Pennsylvania refused to allow Plaintiff to add to its case  
 8 contravenes judicial comity. See Ameritox, Ltd., v. Aegis Sci. Corp., No. 08-1168, 2009 WL  
 9 305874 at \*3 (N.D. Tex. Feb. 9, 2009) (reasoning that if the court were to transfer the case  
 10 under the first-to-file rule, despite the prior court’s decision denying leave to amend to add  
 11 the cause of action in that case, the court would in effect have reversed the prior court’s  
 12 decision). Therefore, the Court DISMISSES the 577/IDS cause of action, without prejudice.

13 The Court finds that claim-splitting is not a valid basis for dismissing this case. In  
 14 addition, the Court does not reach Defendant’s alternative Motion to Transfer because the  
 15 first-to-file rule is dispositive of this Motion.

### 16 III. CONCLUSION

17 For the foregoing reasons, the Court TRANSFERS the 508/IDS cause of action to  
 18 Pennsylvania, DISMISSES the 577/IDS cause of action without prejudice, and does not  
 19 reach the venue transfer motion.
